

TECHNIREZ R2517 is a solvent free, liquid epoxy resin specifically designed for use with H2430 and H2431 hardeners to cure at temperatures ranging from 15°C to 60°C.

The two hardeners H2430 Fast and H2431 Slow enable the cure time to be adjusted according to the ambient temperature.

This system is suitable for general purpose laminating applications.

MIX RATIO

25 parts H2430 hardener to 100 parts resin by weight
25 parts H2431 hardener to 100 parts resin by weight

Note: Care should be taken when dispensing and mixing. Do not attempt to control the cure time by altering the hardener ratio. Contact ATL Composites for specific information.
